

## PRESS RELEASE

### werwie – strong machines, strong partners

---

**Konz, February 18th, 2025.** For over 30 years, werwie GmbH has stood for quality and reliability as well as first-class service in road construction, earthwork and agricultural technology. As an international hub for used machinery, werwie offers purchase and rental solutions for construction projects of every size. Thanks to close partnerships with global market leaders, this German company has developed to become a proven focal point for construction companies, local authorities as well as infrastructure projects. werwie has been part of the family-run Robert Aebi Group based in Regensdorf, Switzerland since December 2021.

#### **Sales - a global network for success**

Having sold more than 10,000 machines in over 120 countries, werwie's portfolio includes leading brands such as Vögele, Hamm, Wirtgen, Bomag and John Deere. Over 100 machines are serviced and ready for use at any time. Shipping is quick and easy, including worldwide customs clearance. Furthermore, werwie offers original spare parts with flexible delivery options, including standard, express and NOX. A further service offered is the purchase of used machines. Machine assessment is free of charge.

#### **Rental services - flexible solutions for every project**

werwie's rental solutions provide state-of-the-art technology for demanding road and earthwork projects - with locations in Konz, Bad Hersfeld, Neckarsulm and Achstetten. More than 1,500 rental projects have already been successfully completed across Europe.

The rental portfolio includes feeders and pavers in all classes (Mini 500 to S3000), including the latest Vögele 5 generation. Special machines such as SprayJet pavers are also available for complex road construction projects. werwie also provides machines for soil stabilisation

and rollers for asphalt and earthworks. The range is supplemented by fixed-width screeds, BigSkis and other special solutions.

### **Service - maximum efficiency, minimum downtime**

Everyday work on construction sites places high demands on machines - which is why werwie offers tailored services to ensure smooth operation. The company's own paint shop enables individual machine coating. A mobile service available throughout Germany minimises downtimes with fast maintenance and repairs. Customers also benefit from professional on-site training for machine operators to ensure the efficient use of the technology.

### **New partnership with Fliegl - thermal push-off trays are now available**

in 2025, a new cooperation with Fliegl Bau- und Kommunaltechnik GmbH will expand werwie's range to include thermal push-off trays - a perfect addition for modern road construction. These machines can now be rented via werwie – Fliegl forwards requests directly. werwie also takes used thermal push-off trays as trade-ins and resells them. Purchase of new machines is also possible via werwie's global network.

With this expanded range, werwie is underlining its decades of experience as a reliable partner for construction machinery - today and in the future. "This strategic collaboration allows us to combine the strengths of both companies and to develop innovative solutions in road construction and agricultural technology as well. It surely is an important step in werwie's growth strategy to further expand our market presence and open up new areas of business", explains Marius Jakoby, Managing Director at werwie.
